## ELĒKRON – FACTSHEET

- Elĕkron is the **world's first all-electric vehicle indoor stunt theatrical show**.
  - Super-fast electric cars can produce **power equivalent to 500bhp petrol engine cars**
  - Can obtain **0-60mph in just 3.5 seconds** if drivers don't spin the wheels.
  - Developed a brand new operating system for the electric bespoke cars which was built from scratch
- Elĕkron is very **eco-friendly** – no petrol engines are used but cutting-edge technology gives the electric cars and bikes the highest level of power, control and performance of any electric vehicles.
- All of the excitement throughout the night is confined to a tight space of **only 900 square meters**, smaller than **an Olympic size swimming pool**, requiring drivers to have impeccable control over their high-torque electric vehicles.
- **More than 150 cast, crew and creative team members have been assembled from all over the world** to bring Elĕkron to life.
- **Elĕkron's team of choreographers and performers** have worked on **London's West End**, at the **Royal Shakespeare Company, Royal Opera House, Cirque du Soleil, Franco Dragone** and many other major theatres and production companies.
- Set, lighting and projection design comes from teams that have worked on stadium shows, **Beijing Olympics** opening & closing ceremonies and international touring shows including **Beyoncé** and **Jay-Z's current world tour**, **Elton John's current farewell concert** as well as for **U2, The Lady Gaga, Madonna, The Rolling Stones, Michael Bublĕ, Robbie Williams, AC/DC** and many more.
- Dozens of powerful electric vehicles are **custom-made** especially for Elĕkron. **Two of the buggies are specially designed to act as launch ramps for the bikes.**
- All the vehicles featured in the show are bespoke and designed from scratch, and **powered by Telsa motors** with a custom-designed control system.
- The cast is made up of **international stunt drivers and riders, aerialists, parkour acrobats, pyrotechnic and fire performers, and world-class circus artists** – including a local **Macau stunt bike rider and Guinness World Record holder Kangaroo Kid**. Countries represented include: the UK, the US, Finland, Canada, China, Germany, Australia, the Czech Republic and Uruguay.

STUFISH

- The show begins with a short film that then explodes into live action – **a post-apocalyptic action movie meets live-action arena spectacular – utilizing the power of electricity.**
- The show also features a huge set-piece finale sees a silver biplane flying into the arena. Walking on the wings are seven Arc Angels who perform dance moves and balancing acts while standing on both sets of wings and also hanging underneath the plane. We believe this is unique and original to Elēkron and has not been seen before in a live theatrical circus/stunt show.
- Show highlights include setting a **Porsche on fire** and driving it around the arena while motorcycle riders and buggy drivers chaotically **drive up and drop in from the top of a huge projection screen at a height of 12 meters, at an incredibly steep 65 degree angle** and come screeching to a halt just a couple meters from the audience. The biggest cheer of all arrived when an electric biplane soared right over the crowd with seven world-class aerial wing-walkers dancing on top. Arc Angles presents **the breathtaking aerial stunts at approximate 12 meters**, equivalent to the height of 4th floor.
- The closest distance of our performers with first row of audience is **around 2.55m**
- **Safety barriers are installed around the arena** because the bikes, cars and buggies get so close to the audience that they will feel as though they are part of the action.
- Studio City Event Center has been **specially modified** to accommodate the traffic flow of bikes, buggies, cars and trucks to bring the audience the unique Elēkron experience.
- Backstage will be transformed into a **power-charging station for more than 40 electric vehicles.**
- The action-packed 75-minute show needs a **permanent backstage garage** and a **team of car mechanics** for daily maintenance.
- The creative team of Elēkron aims to create never before seen stunts, daredevil acts that will wow and entertain audiences from all over the world.
- Original score specially composed for Elēkron by young and up-and-coming UK film score composer Adam King. The music will range from **dramatic drumming and mysterious atmosphere to funk, techno, EDM and heavy metal.**
